ROM News

- The inaugural KM Global Week, led by Moria Levy on behalf of KMGN, was a remarkable success. This global initiative saw activities held in 13 countries, igniting enthusiasm for knowledge management worldwide. Looking ahead, next year promises an even larger celebration with more countries and activities. This event has initiated a new tradition, reinforcing the global knowledge management community's unity and collaboration.
- On November 16th, we will hold the last KMGN roundtable of the year titled "Reblooming the Knowledge Movement". The event will be led by Dr. Annie Green and the panelists will include: Dr. Alex Bennet, Robert Turner, Dr. Nancy Dixon, Dr. Thomas Stewart, Dr. Bill Halal, Dr. Anthony Rhe, and Dr. Tori Dodla. Expressing via Graphs

Bella Graff's "Graph Expression" is a 2023 digital book (Hebrew) on data visualization, offering a comprehensive model for crafting meaningful graphs. It covers key concepts such as purpose, measurement, categories, and visualization structure, emphasizing the importance of combining visuals and text for enhanced data understanding and decision-making. Graff's book equips readers with valuable tools for precise graph design.
