01

Responsive or mobile: which website is preferable?

When building a website for mobile devices, consider whether to design it responsively or optimize its content for mobile. Key factors include the type of data displayed, financial concerns, advertising spaces, and cellular services. Use Google Analytics to make informed decisions.

02

Social Planning

Planning is essential in personal, social, and professional aspects of life. Social planning integrates efficiency and rationality, enhancing communal life and work environments. Sharing social planning involves setting up a professional desktop, collecting data, improving communication, and achieving consensus. Technological solutions like the MASH app simplify the process by customizing profiles for social and work-oriented activities.

03

Simple Content Management

Content managers play a crucial role in organizational websites. Simplifying content management systems can enhance their experience and productivity.
