01

Emails and Knowledge Management

Email overload poses challenges to Knowledge Management as valuable knowledge gets lost. AI software solutions are being developed to prioritize and manage emails effectively.

02

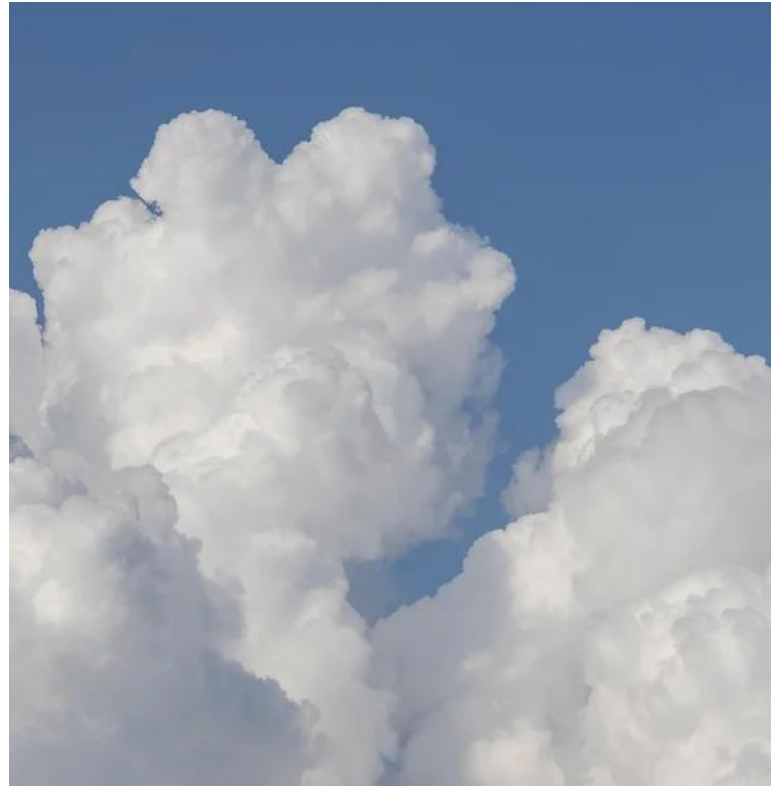

Sending messages and notifications via Smartphone: doing it the right way

Mobile notifications can be bothersome but also effective. Customization, relevance, and timing are key factors for successful messaging.

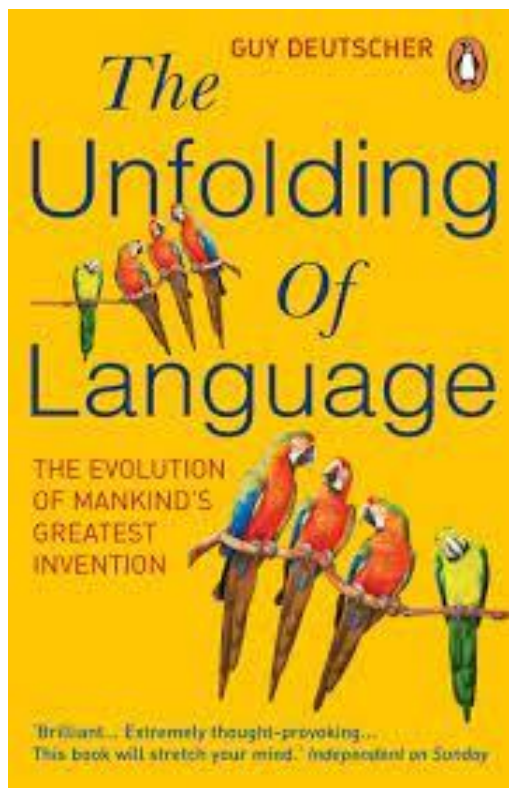

03

Computing Clouds and Knowledge Management

Computing clouds provide remote access to information, eliminating the need for hardware and software management. IAAS, PAAS, and SAAS options offer infrastructure, development environments, and software services. SAAS is particularly beneficial for knowledge management, facilitating document sharing, creating portals and databases, and establishing knowledge communities.
