### Which font is suitable for my text?

When we choose fonts for the body of the text, we should ask ourselves: does this font-family include enough styles (for example, italic or bold)?

Is the font suitable for the environment in which the text will "live"? Will the readers find the font comfortable and enticing?

### The Brain That Changes Itself - Book review

Norman Doidge's "The Brain That Changes Itself" explores neuroplasticity, where the brain adapts and changes. It outlines four types of flexibility and emphasizes genetics, environment, and individual-level training in shaping our brains. It's a valuable read for brain science and personal development enthusiasts.
